

Your Speed Is Signs (YSI/SID)

For Speed Warning

With an ever-increasing number of vehicles and pedestrians using our transport networks, drivers encounter more and more distractions. Road traffic accidents happen for a number of reasons, many of which are linked to human error. A large number of incidents could be avoided if drivers were more aware of the speed they were travelling and what's around them. Informing and advising drivers of excessive speeding are key benefits of the 'Your Speed Is' / Speed Indicator Device Signage (SID).

Coeval's Your Speed Is Signs (YSI)/Speed Indicator Devices (SID) are designed to support speed awareness - warning drivers exceeding safe speed limits and encouraging them to slow down. We design, build, install and maintain bespoke technology solutions that advise, inform and protect road users and help to reduce driver error.

We provide an extensive range of bespoke YSI LED signs that are sustainable and affordable.

Our products have a robust build, with high-power LEDs that can be seen clearly even in hazardous conditions or inclement weather. With bespoke YSIs we can provide the right signage for all rural and urban environments.

KEY FEATURES & FUNCTIONALITY

- Cloud Control application for remote monitoring and data provision
- Vehicle activated via integral or external radar
- Reliable LED technology
- Full range of character sizes
- Low power and low cost
- Signs can be: LED only, LED & foil combined, foil with conspicuity devices

SERVICES

- Site surveys
- Extended warranty options
- Maintenance regimes
- Data analysis

We provide an extensive range of bespoke LED signs that are sustainable and affordable, with different character sizes.

Coeval is a specialist in robust, LED road sign-based systems that advise, inform and educate and are:

- More easily noticed by drivers than static signs
- Visible in all conditions, including at night
- Flexible to your needs

SPECIFICATION OVERVIEW

- **Specification:** EN12966-1:2005+A1: 2009
