

School Warning Signs

Road safety is improving around Britain but the walk between home and school is a particularly vulnerable point for many school children. Child pedestrian casualties for the year ending June 2019 were 5,310*. For many, one of the main risks is the road area directly surrounding the school gates; with speed limits and parking regulations often ignored or poorly enforced, and a heavy mix of pedestrians and vehicles.

Coeval has developed school sign solutions to help protect children and adults walking to and from school. With varying school opening and closing times, an intelligent, flexible system of school signs is vital to raising road user awareness.

Our School Timer Radio Network is smart enough to make road users change their behaviour at crucial times of the day, preventing high-speed collisions and saving children from injury and death.

The Coeval School Warning Sign solution is a reliable and expandable school safety system that is simple to activate and as such can easily be operated by school staff. Our engineers show school staff how to operate the school signs, so the system is in the hands of those who know when best to utilise it. The signs are designed specifically to warn drivers exceeding safe speed limits where safety is a concern at certain times of the day.

*DfT, November 2019

KEY FEATURES & FUNCTIONALITY

- Only one SIM card per school
- Text message activation and alarms
- Slaves can relay to distant units
- Solar power option
- Cloud Control application for remote monitoring and data provision
- Timetable for 5 years

SERVICES

- Site surveys
- Extended warranty options
- Maintenance regimes
- Data analysis

We offer a wide range of part-time speed limit signs and Type 1, Type 2 and Twin amber flashing designs that are sustainable and affordable, with a wide range of speeds and standard pictograms available. For even more flexible systems, Coeval provide a full matrix Variable Message Signs (VMS) that can be completely customised to your desired message; further helping to protect children or large influxes of pedestrians.

Recognising that schools and local authorities continue to deliver under budget constraints, the Coeval school safety solution has minimal annual running costs.

Coeval is a specialist in robust, LED road sign-based systems that advise, inform and educate and are:

- More easily noticed by drivers than static signs
- Visible in all conditions, including at night
- Flexible to your needs – displaying different speed limits / messages as required
- Remotely controllable using our cloud-based software

SPECIFICATION OVERVIEW

- **Power Options:** Switched mains and mains
- **Renewable Sources:** Solar or wind turbine
- **Power Consumption:** Approximately 130mA at 12V DC
- **Mobile Phone SIM Requirements:** Data-enabled SIM
- **Security:** Password change facility
- **Calendar Set Up:** By Bluetooth, Wi-fi and RS232
- **Housing:** IP66 Enclosure, Grey and Black RAL 9005
- **Symbol Heights:** 600mm, 750mm, 900mm and 1200mm
