

Portable Signs

This compact and portable fixed or variable message sign offers a wide range of display options including speed indication/warning and pictograms. This sign solution is ideal where space is at a premium. The size and portability of the Coeval ii4800 range makes it easy to transport and deploy and is available with either mains power or solar/battery options.

EN12966 compliant, the ii4800 is an ideal signage solution for informing, advising and influencing road users and the wider public.

A robust 3mm steel construction incorporating a compact battery box and foldaway handles for ease of mobility, the Coeval ii4800 is the ideal choice for temporary LED signage requirements – particularly useful during events, short term roadworks and to provide key messages in more urban environments (such as the recent Covid communications).

The usability of Coeval ii4800 portable unit is further augmented by user-friendly software - the signs are easily programmable with a quick and simple setup.

An optional towing trailer specifically designed to carry the ii4800 is also available. It is fully galvanized and features a fixed lighting system.

The Coeval ii4800 carries a full 2-year return to base warranty.

Disclaimer: All Information contained in this document is up-to-date and correct at the date of issue. E&OE. Issue no: 2 - 22.3.22

KEY FEATURES & FUNCTIONALITY

- User-friendly technology
- Full colour RGB
- Compact and easily transported and deployed
- Remotely monitor and control all signs via our Cloud-based software
- Brightness control via either a timetable or light sensor
- Battery voltage monitoring
- Interfaces: RS232, Ethernet, Bluetooth, Wireless, Wi-fi, GSM/GPRS
- LED detection and error reporting
- Temperature monitoring and control
- Data logging of activities, with downloadable files via Bluetooth/GPRS
- Adjustable speed threshold for use on variable speed roads
- Capable of holding 3 x 12v 110Ah batteries

SPECIFICATION OVERVIEW

- EN12966 compliant
- 48x48 12mm pixels
- Aluminium powder coated housing resistant to dust, rain and/or snow
- IP55 rated
- LEDs protected with polycarbonate lenses
